Training

Training in AI/ML | *Allsoft Solution* **June 2025 - July 2025**

Arif Reyazi and Harendra Singh Rajpoot

- Built and deployed a machine learning–based Movie Progress Prediction model by analyzing key features such as budget, cast, genre, and audience engagement using NumPy, Pandas, Scikit-learn, and TensorFlow.
- Performed data preprocessing, exploratory data analysis, and feature engineering to clean datasets, visualize insights with Matplotlib & Seaborn, and improve model performance through tuning and optimization techniques.
- Built and evaluated multiple ML models (Linear Regression, Random Forest, Gradient Boosting, ANN, CNN, RNN, LSTM), improving prediction accuracy by applying cross-validation and reducing overfitting using regularization and dropout.

Projects

Deepfake-Detection | *Python3, Django, React* **Feb 2026 - Mar 2026**

- Developed a Deepfake Detection system using deep learning to identify manipulated images.
- Utilized CNN architectures (EfficientNetB0 and Xception) with preprocessing techniques such as face cropping, normalization, and data augmentation.
- Applied transfer learning, data augmentation, and optimized training pipelines using Python, TensorFlow/PyTorch, and OpenCV to improve model performance.
- Repository Link: **https://github.com/abhinav-dasari/Deepfake-Detection**

Air and Water Monitoring Models | *Python3, TensorFlow* **Nov 2025 - Dec 2026**

- Developed a Streamlit-based Environmental ML Dashboard to predict Air Quality Index (AQI) and Water.
- Implemented time-series feature engineering techniques (lag features, rolling averages, temporal indicators) to enable accurate AQI forecasting up to 30 days ahead, and built an ensemble-based classification system analyzing 20 water contamination parameters with probability-based evaluation to predict safe vs unsafe water quality.
- Applied multiple machine learning models including Random Forest, Gradient Boosting, Decision Tree, and KNN.
- Repository Link: **https://github.com/abhinav-dasari/Air_and_Water_Monitoring_Models**

Certificates / Certifications

Interpersonal Communication for Engineering Leaders **Mar 2026**
Coursera — Certificate Link

Essentials Automation Certification **Nov 2025**
Automation Anywhere — Certificate Link

Build Generative AI Apps and Solutions with No-Code Tools **Aug 2025**
Infosys — Certificate Link

Master Generative AI & Generative AI tools (ChatGPT & more) **Aug 2025**
Udemy — Certificate Link

Skills

Languages: Python, C++, SQL

Technologies/Frameworks: HTML, CSS, JavaScript, React JS, PyCharm, Jupyter Notebook

Domain Skills: Machine Learning, Deep Learning, CNN, TensorFlow, PyTorch, OpenCV

Education

Lovely Professional University **2023 – Present**
Bachelor of Technology - Computer Science and Engineering — CGPA: 6.83 *Phagwara, Punjab*

TMR School/Jc. Madhira **2021 – 2023**
12th — Percentage: 90.01% *Madhira, Telangana*

TMR School Madhira **2020 – 2021**
10th — CGPA: 10 *Madhira, Telangana*
